PROFESSIONAL SUMMARY

Principal Engineer, Data & AI Architect, and Technical Leader with extensive experience designing cloud-native data platforms, distributed backends, and production agentic AI systems. Recognized by Google as a **Google Developer Expert (GDE) in Cloud & AI** and active contributor in **Gemini early-access product feedback programs**. Track record includes cutting Fintech Data Lake costs by **88%** (Databricks to BigQuery), reducing Databricks spend by **57%** via Serverless FinOps, leading a **40+ TB** multi-project legacy migration (Hadoop, Oracle, Greenplum) to GCP alongside **Google Professional Services (PSO)**, and building from scratch the Americas' largest livestock Data Lake (AWS to GCP) that catalyzed an acquisition by a European group.

CORE COMPETENCIES & TECHNICAL SKILLS

Programming & Distributed Systems: Go (Golang), Python, Rust, SQL, gRPC, Protocol Buffers (Protobuf), Optimistic Concurrency Control, Distributed Scheduling, Microservices, REST APIs, Linux.

Agentic AI & Machine Learning: Google Agent Development Kit (ADK Go / ADK Python), Gemini Models & API, Vertex AI, Model Context Protocol (MCP), Agent-to-Agent (A2A), Human-in-the-Loop (HITL) Workflows, LLM Orchestration, RAG.

Data Engineering & Analytics Platforms: BigQuery, Databricks, Apache Airflow, Dexaflow, Apache Spark, Dataproc, Hadoop, Oracle, Greenplum, Greenfield Data Lakes, Data Warehouse, Master Data Management (MDM), Dataform, dbt, Business Intelligence (BI), ClickHouse, PostgreSQL.

Cloud Infrastructure, FinOps & Leadership: Google Cloud Platform (GCP), Amazon Web Services (AWS), Cloud Run, Cloud Firestore, Eventarc, Cloud Tasks, Kubernetes (GKE), Docker, DevOps, CI/CD, Cloud FinOps, Engineering Management, Technical Leadership, Agile Delivery.

SELECTED ENTERPRISE CASE STUDIES & MEASURABLE IMPACT

FINOPS & CLOUD MIGRATION · BRAZILIAN FINTECH

88% Data Lake Cost Reduction (Databricks to BigQuery)

Architected and led the migration of an enterprise Data Lake from Databricks to Google BigQuery at a Brazilian Fintech, achieving an **88% reduction** in infrastructure cost while improving query SLA and data governance.

FINOPS & SERVERLESS ARCHITECTURE · DATABRICKS

57% Cost Reduction on Databricks via Serverless & FinOps

Delivered a **57% cost reduction** on Databricks workloads by implementing FinOps governance, migrating pipelines to serverless compute, and applying storage/partitioning architectural best practices.

LATAM-SCALE PROGRAM & GOOGLE PSO

40+ TB Legacy Migration Program & Google PSO Engagements

Led a 4-project enterprise migration program transferring **~40 TB** of data from legacy Hadoop, Oracle, and Greenplum environments to Google Cloud (among the largest in Latin America), and acted alongside the **Google Professional Services (PSO)** team on flagship enterprise projects in Brazil.

GREENFIELD AGTECH PLATFORM · EUROPEAN M&A EXIT

Americas' Largest Livestock Data Lake → European Acquisition

Founded and architected from scratch an AgTech Data Lake on AWS and subsequently led its migration to GCP—establishing the largest livestock data platform in the Americas, driving revenue growth and enabling the company's acquisition by a European group.

PROFESSIONAL EXPERIENCE & LEADERSHIP TRAJECTORY

ENGINEERING MANAGER & TECHNICAL LEADER

RD Station · Avenue Code · Acerto

Managed and technically led multidisciplinary teams across Data Engineering, Artificial Intelligence, DevOps, and Software Engineering—building high-performing engineering cultures focused on measurable business outcomes and human care.

PRINCIPAL IC — DATA & AI ENGINEER

Engineering · Prodap · Bysat · D-Analytics

Hands-on Principal Software & Data Engineer delivering enterprise Data Platforms, greenfield Data Lakes, Master Data Management (MDM), BI, and AI initiatives across GCP, AWS, Hadoop, Python, Go, and SQL (including own consultancy, D-Analytics).

ENTREPRENEUR & STARTUP FOUNDER (2X)

Conserta AI & Consertos Legais

Founded **Consertos Legais** (an Uber-like on-demand marketplace for home appliance maintenance) and led its product pivot into **Conserta AI**—an intelligent diagnostic chatbot providing automated repair instructions.

OPEN-SOURCE & SYSTEMS ARCHITECTURE

GOOGLE / ADK-GO · UPSTREAM CONTRIBUTOR

Firestore Session Service for Google ADK Go v2

Designed and implemented **`google.golang.org/adk/session/firestore`** (PR #2058 / Issue #2057), enabling durable HITL agent pause/resume on serverless GCP stacks with optimistic concurrency control and 91.4% test coverage.

`Go 1.26 · Firestore · gRPC` **github.com/google/adk-go/pull/2058 ↗**

DEXADATA / DEXAFLOW · CREATOR & PRINCIPAL ARCHITECT

Dexaflow — Airflow-Compatible Orchestrator in Go

Re-engineered Apache Airflow's scheduling and REST/UI control plane into a single Go binary, eliminating Python GIL bottlenecks while providing Kubernetes pod-per-task isolation and GitOps-native DAGs.

`Go · Kubernetes · Workflow Orchestration` **github.com/dexadata/dexaflow ↗**

AWARDS, COMMUNITY SPEAKING & LANGUAGES

GOOGLE RECOGNITION

Google Developer Expert (Cloud & AI) & Gemini Feedback

Official Google Developer Expert in Cloud & AI and active contributor in Google's early-access Gemini product feedback loops.
Verify in GDE Directory ↗

SPEAKING & MENTORSHIP

TDC · DevFest BH · Data Science Academy

Speaker at **The Developers Conference (TDC)** and **DevFest BH**; Organizer & Speaker at **Data Analytics Meetup**; Technical Mentor at **Data Science Academy**.

LANGUAGES

Portuguese & English

Portuguese: Native
English: Intermediate (B2 — Professional Technical Working Proficiency)
